Overview

Coral Triangle Safaris (CTS) was established in 2017 from a passion to explore this beautiful country, Indonesia, the world's largest archipelago with over 18,000 islands. The best kept secret beaches and dive sites are only accessible by sea and one of the best ways to travel to them is on Sequoia, our handcrafted yacht. We understand that each guest is different and therefore, we craft a specific safari that will meet your family's needs. Your choice of activities and interests will help define your safari whether it is venturing out to sea or relaxing across from a majestic island. Our goal is to help you and your family see and enjoy one of the world's most beautiful places-The Coral Triangle-at the end of the earth-as safely and comfortably as possible.

Completed in 2017, Sequoia is a modern take on the classic wooden yacht. Named after the giant Sequoia tree, one of the oldest living organisms on earth, this handcrafted yacht was designed as an heirloom vessel for generations of families to enjoy. Using traditional, Indonesian Bugis boat construction, the hull and super structure are comprised of Ironwood and Teak. The interior fittings and mechanical components are integrated into a state of the art American engine room and electrical power systems. Custom designed light fixtures illuminate the night sky and the underwater lighting allow you to see some of the magic below. With Sequoia, East meets West with modern, custom-made amenities, melded with Indonesian tropical island beauty. You will be able to enjoy this remote island wonderland in complete comfort.

2019 Booking Rate:
